

Authorless Topic Models: Biasing Models Away from Known Structure

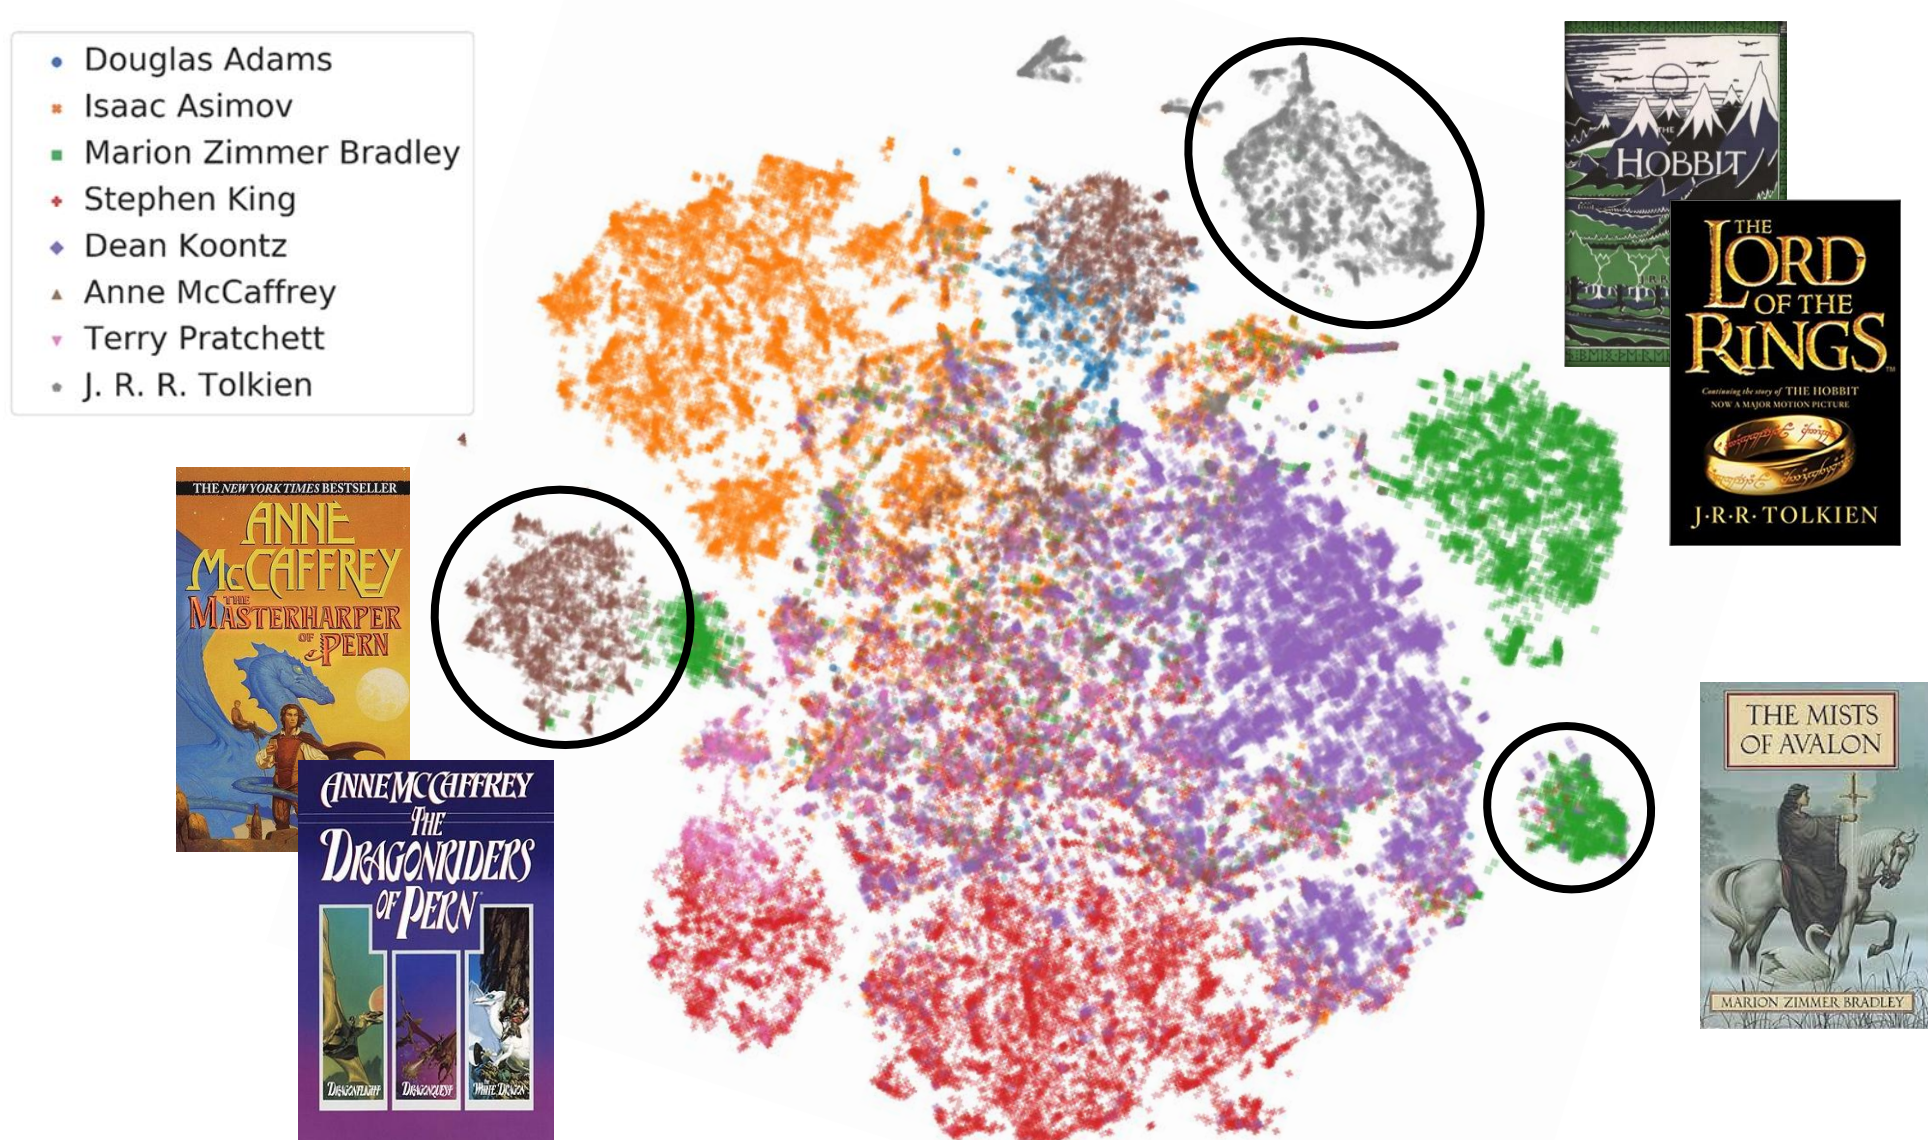

Laure Thompson
laurejt@cs.cornell.edu

David Mimno
mimno@cornell.edu

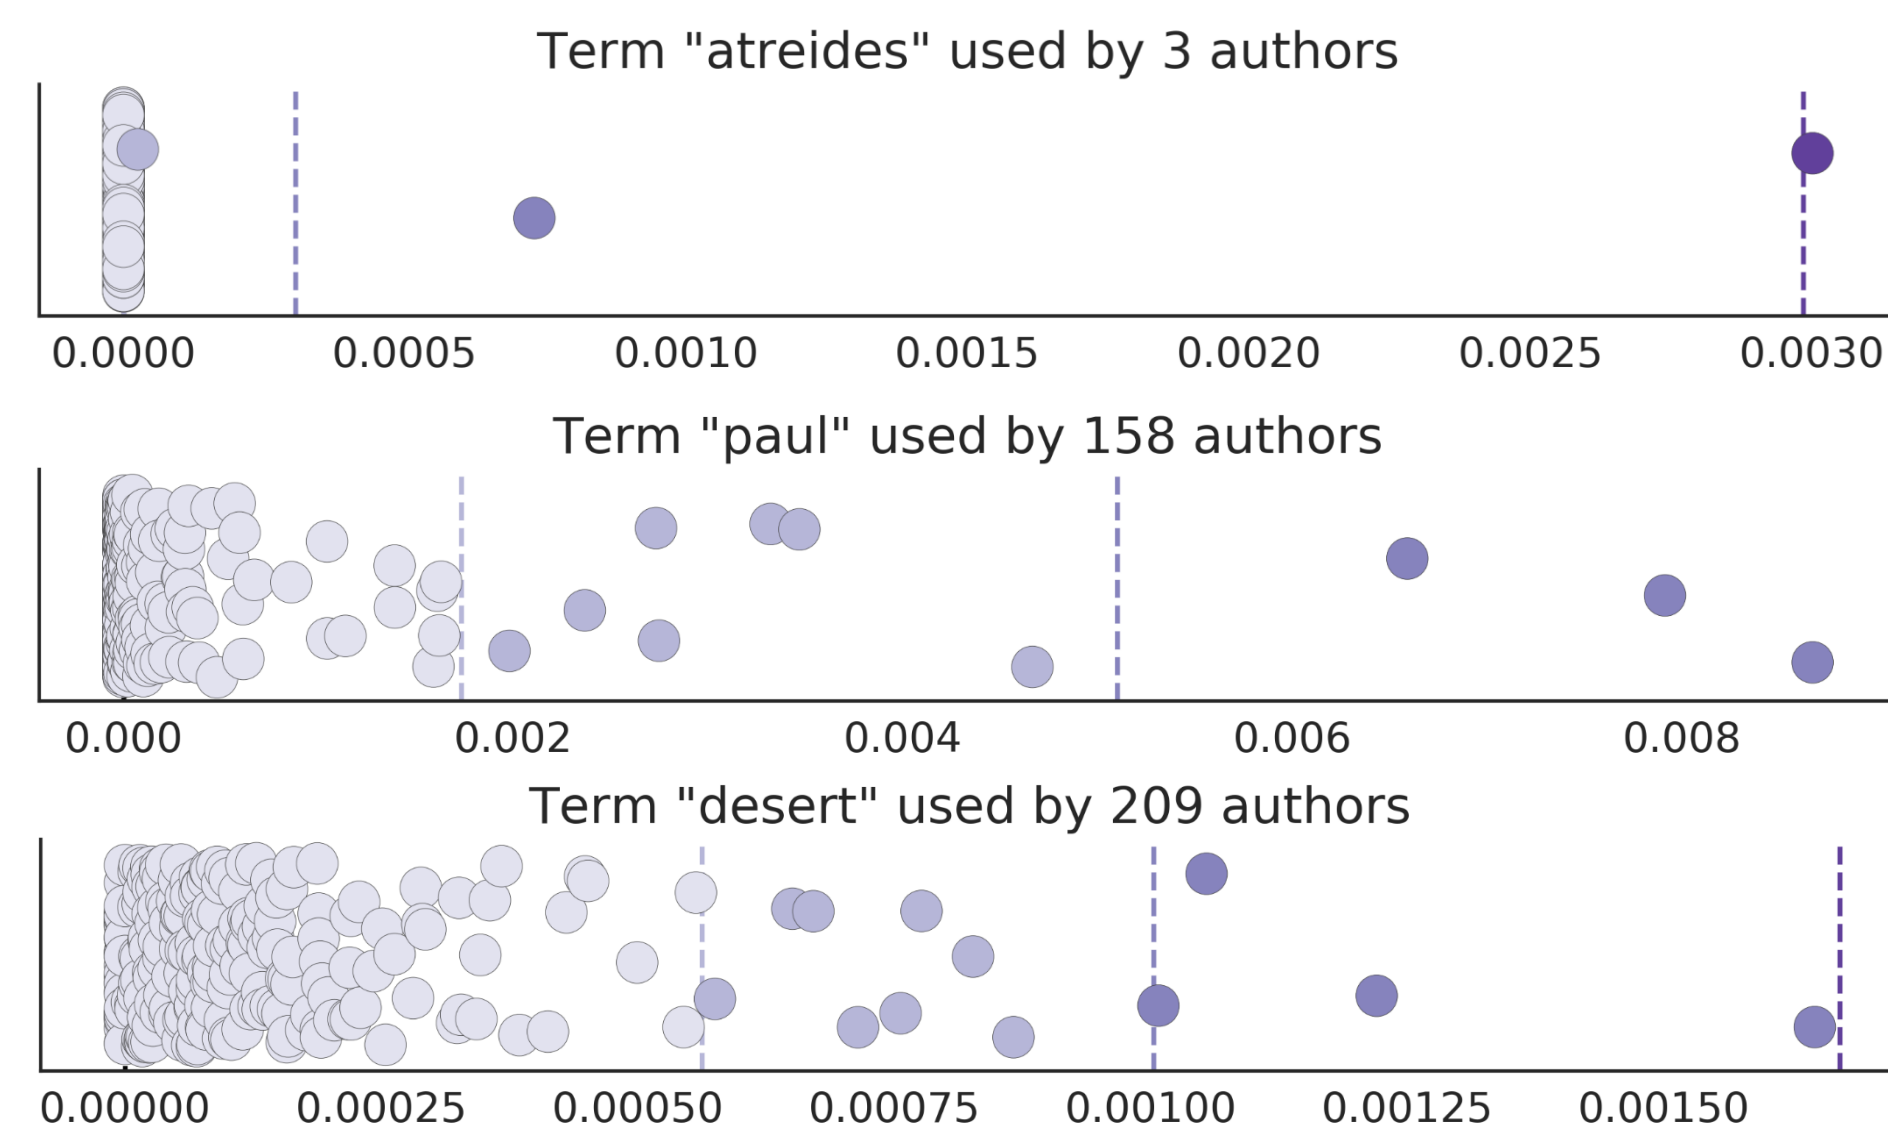

Setting: Mapping Speculative Fiction

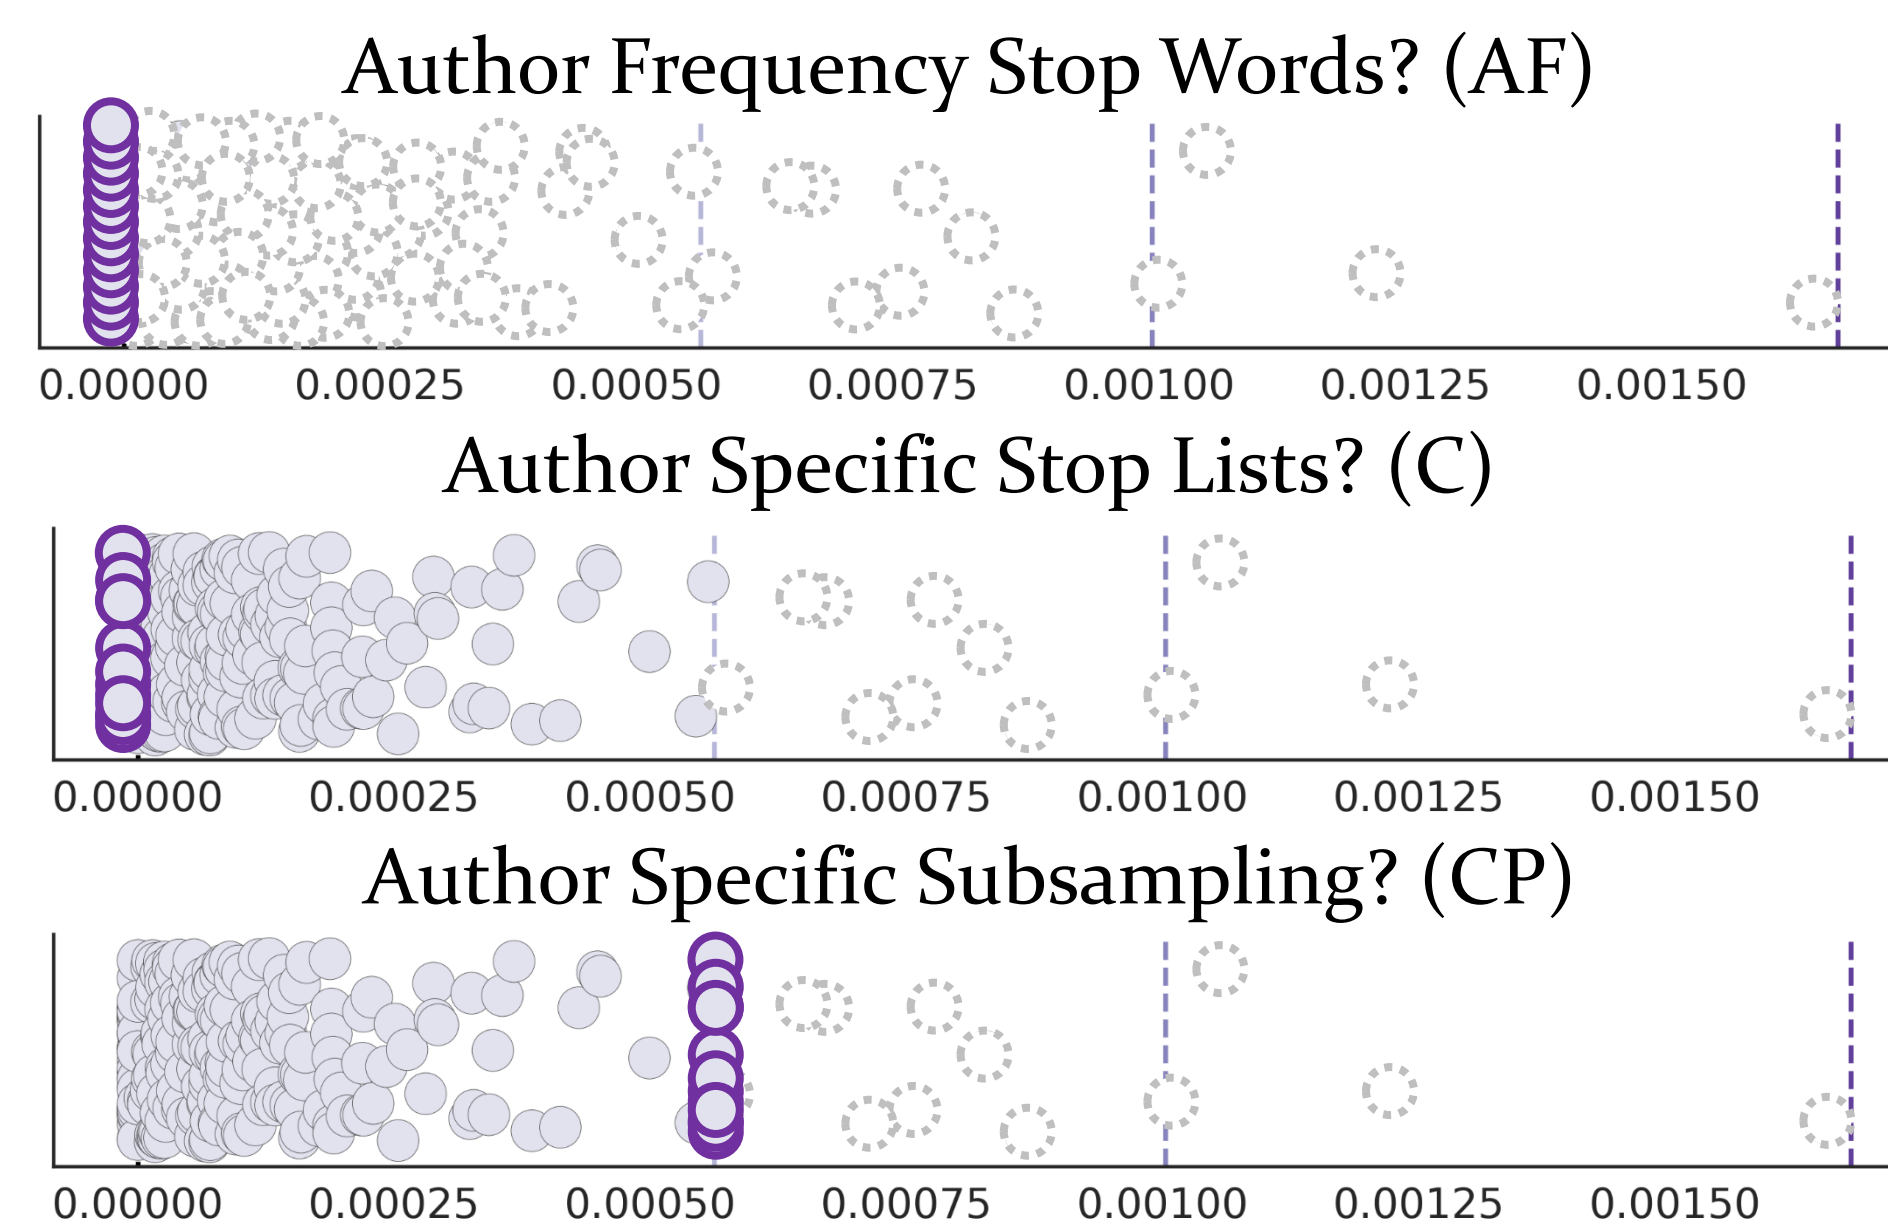

...but topics correlate with author/series!

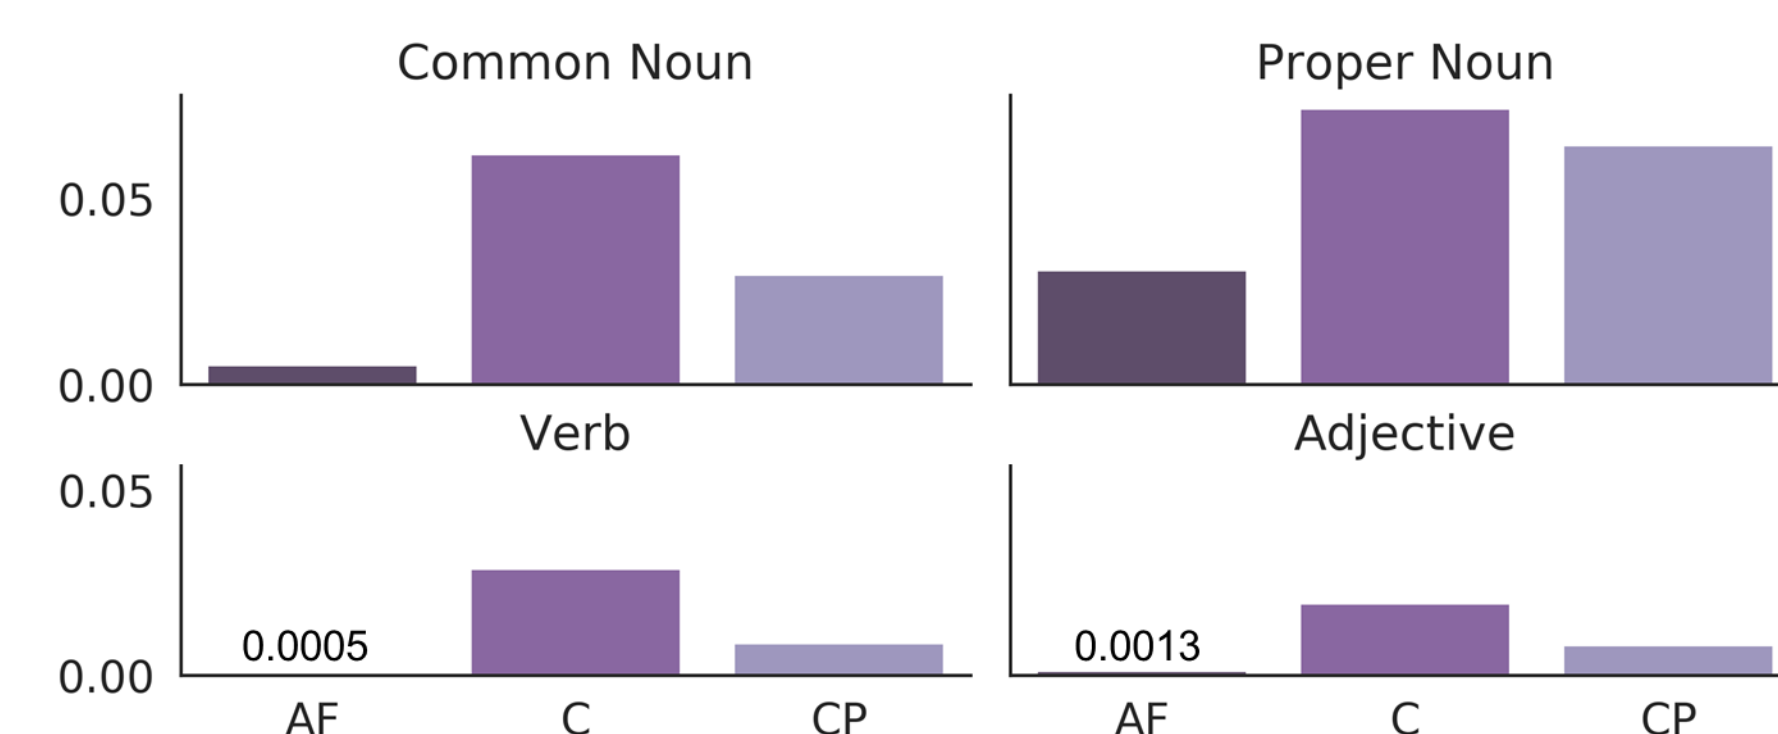

What about word-level correlations?

Preprocessing
Purposeful Data Modification!

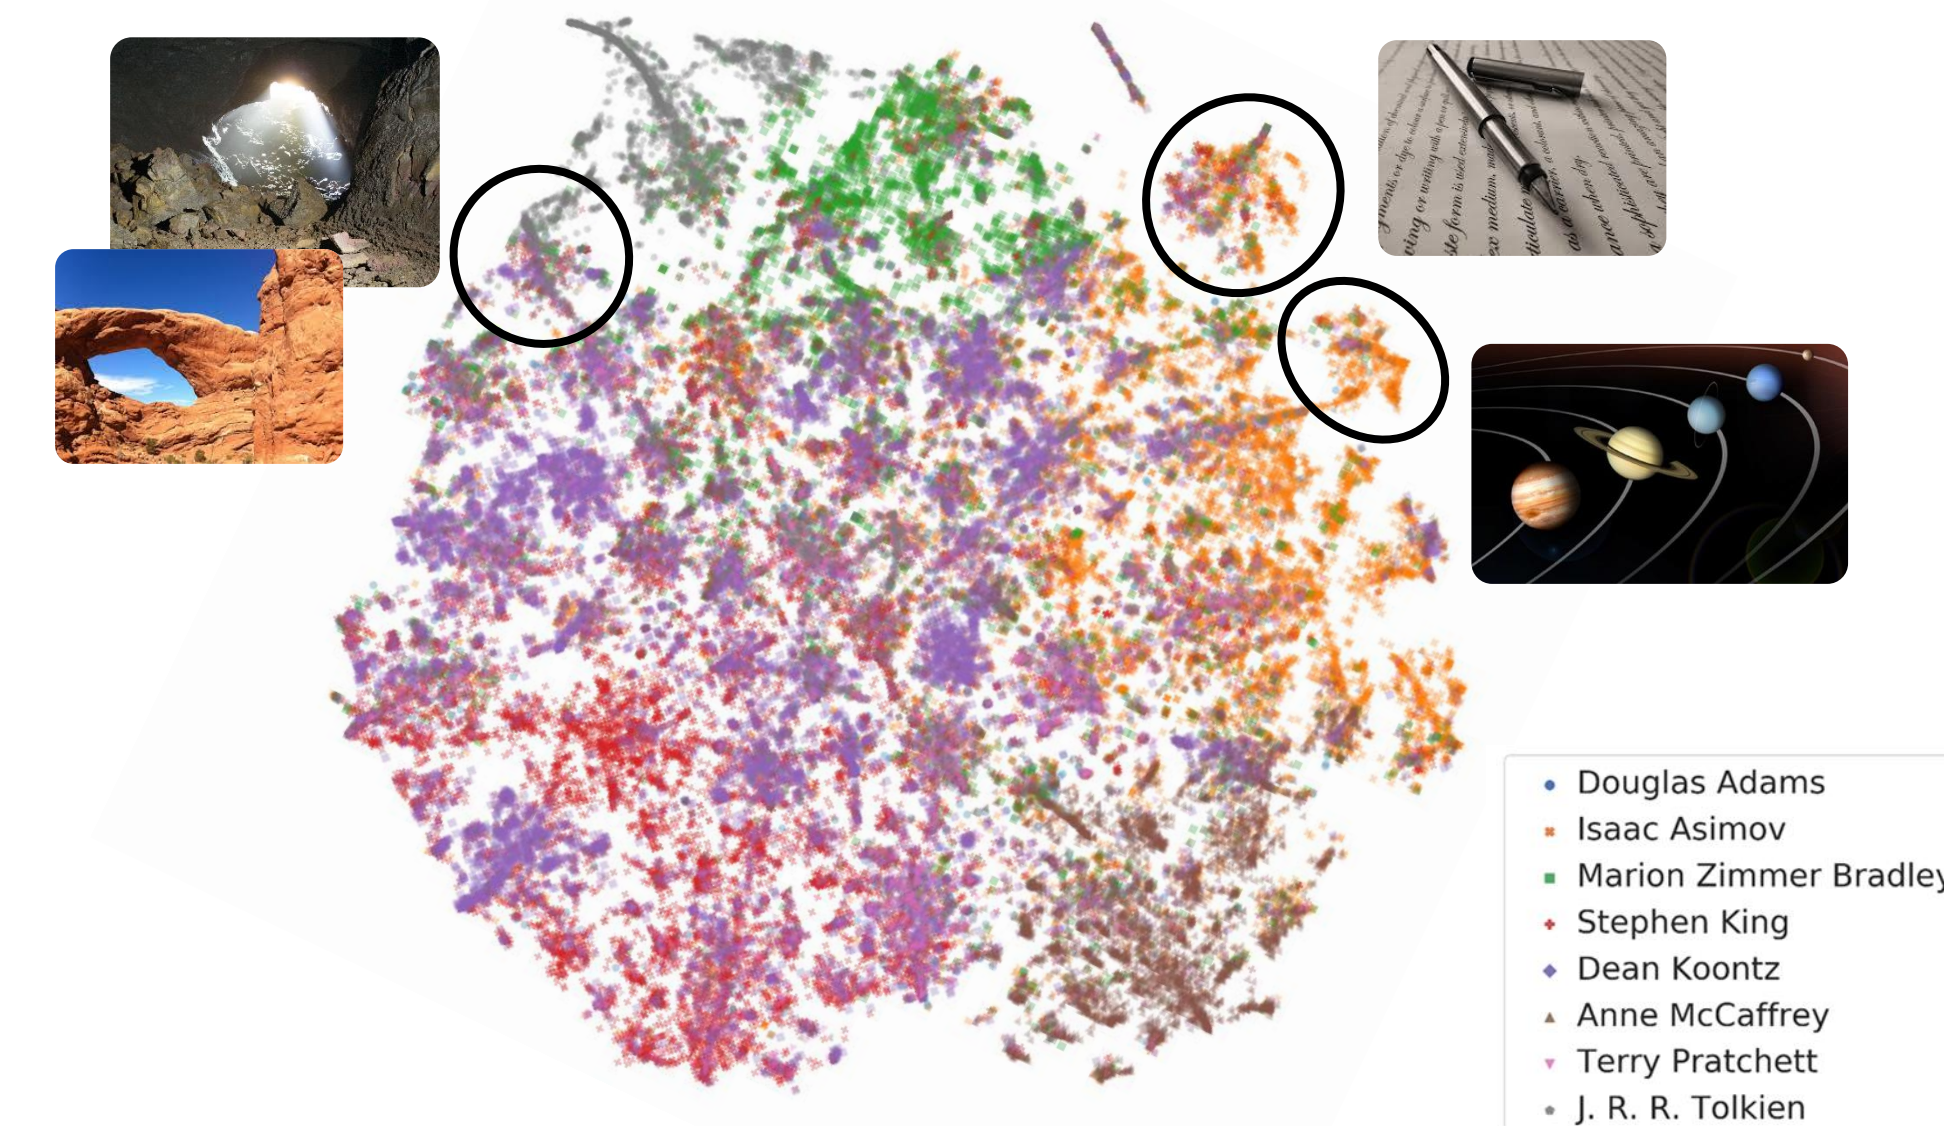

Removing more than names!

Author Diversity vs. Topic Stability

Subsampling yields cross-cutting topics

Author correlations can be hard to see!

A	B	Top Words
✓	✓	school professor work university years research science students student college study class
✓	✗	sand pirx mars desert roger dust rock bass dunes crater martian jeffries kirov dune
✗	✓	old night yes cried town last men rocket god years hands house upon stood wind boy shut
✓	✗	jack emma malenfant trip janet michael ing wireman leonard nemoto sally jeannine
✗	✗	f'lar lessa weyr robinton hold dragon f'nor lord dragons benden rider bronze harper

A. Does the topic have high author diversity?
B. Do its authors use similar words?

Topics look more cohesive, meaningful
